Description

The divider set 3F can be used to subdivide an L-BOXX 136 G4 into three separate compartments. Larger tools and work utensils can be securely stowed away and transported in the subdivided compartments. The subdivision provides for enhanced organisation and, as a result, saves time, since there is no more need for lengthy searching. Your materials are always clearly sorted, thus preventing you from forgetting expensive tools or machinery. This structured method of working is guaranteed to simplify your working day, at the same time as impressing your customers.

We reserve the right to make changes in the interest of technical progress, as well as correcting printing errors and mistakes. Pictures are similar, decorative material not included. With the publication of this data sheet, previous editions lose their validity. Version: 21.12.2023
